1: Which of the following is not an example of a stimulus ?

- A Temperature
 - B Sound
 - C Light
 - D Nervousness
-

2: IVF in IVF fertility treatment for infertile couples stands for ?

- A In viva fertilisation
 - B In vitro fertilisation
 - C In vaginal fertilisation
 - D In uteri fertilisation
-

3: Clinical trials, where new drugs are tested on humans are carried out by ?

- A Volunteers
 - B Students
 - C Research scientists
 - D The government
-

4: Which part of the pathway in a reflex arc activates the effector ?

- A Relay neuron
 - B Motor neuron
 - C Sensory neurone
 - D Brain
-

1: Which of the following is not an example of a stimulus ?

A

B

C

D Nervousness

2: IVF in IVF fertility treatment for infertile couples stands for ?

A

B In vitro fertilisation

C

D

3: Clinical trials, where new drugs are tested on humans are carried out by ?

A

B

C Research scientists

D

4: Which part of the pathway in a reflex arc activates the effector ?

A

B Motor neuron

C

D

5: A drug taken to reduce bacterial infection in the body is called a ?

- A Anti-clotting drug
- B Paracetamol
- C Antibiotic
- D Aspirin

6: A scientist who proposes a solution or an answer to a scientific question has a ?

- A Investigation
- B Opinion
- C Hypothesis
- D Theory

7: High salt in the diet of humans causes which condition ?

- A High cholesterol
- B Obesity
- C Diabetes
- D High blood pressure

8: The addictive substance found in tobacco smoke is called ?

- A Tar
- B Carbon monoxide
- C Nicotine
- D Solvent

5: A drug taken to reduce bacterial infection in the body is called a ?

A

B

C Antibiotic

D

6: A scientist who proposes a solution or an answer to a scientific question has a ?

A

B

C Hypothesis

D

7: High salt in the diet of humans causes which condition ?

A

B

C

D High blood pressure

8: The addictive substance found in tobacco smoke is called ?

A

B

C Nicotine

D
